

Frozen UIP prediction files

provenance / md5 gate

Chemistry-stratified matched-yield selection

anion-class strata; common absolute-yield budget Y

Stage 1 — interaction audit

stratum $\times$ coverage DAF interaction;
prototype-blocked bootstrap CI

Shuffle-null control

confidence permuted within stratum;
clean throughout

Stage 2 — robustness audit

leave-one-element-out;
WBM-round splits

Stratum-aware allocator

knapsack reallocation;
FALSIFIED — no dominance

Verdict per model-generation claim

MP-generation vs. OMat-generation
